

Relevant California Factsⁱ

State Medicare Information

- There are 6,224,832 total Medicare beneficiaries in the State of California, which represents 15.7 percent of the total population.
- California Total Annual Medicare Spending equals \$64,795,000,000.

Documented Shortage of Primary Care Health Professionals

- According to the Health Resources and Services Administration, California has 647 total primary care Health Professional Shortage Areas (HPSA).
- California's population living in a primary care HPSA equals 7,719,486, which represents 19.5 percent of the overall population of California.
- There are 990 licensed audiologists in the State of California who could help.

Hearing Loss Statistics

- Of the more than 36 million Americans who experience hearing loss, 30 percent are 65-74 years old and 47 percent are 75 years old and older.
- California has 4,865,762 residents with hearing loss, which represents 12.3 percent of the state population.
- Untreated hearing loss results in a greater occurrence of other physical and mental conditions in elderly patients, substantially reducing the quality of life for older adults and increasing Medicare spending. Treated hearing loss enhances the quality of life and reduces health care costs.

National Data on Older Adult Falls

- Every 18 seconds, an older adult is treated in an emergency room for a fall.
- The average cost for a fall injury is \$30,000 and the direct medical cost for falls is \$50 billion annually.
- Among older adults (those 65 or older), falls are the leading cause of injury death. They are also the most common cause of nonfatal injuries and hospital admissions for trauma.
- Elderly falls are preventable as are their associated financial and societal costs. Audiologists reliably diagnose and treat the vestibular disorders and help prevent older adult falls.
